ScreenD Working Pods. Background: ScreenD hooded chairs with Ligni coffee table, HiBox room dividers and Ligni high table

ScreenD — for attractive contemporary reception, breakout, meeting and working spaces

ScreenD offers low and high back chairs and sofas. High back units may optionally have an enclosing hood for even greater privacy, and be combined with a linking panel and optional table to form meeting booths.

Working Pods are high back chairs with an integral double shelf and swivel laptop table, creating practical and comfortable private work spaces.

Carrels are small enclosed desk spaces, with height-adjustable worksurfaces to enable either seated or standing work. Carrels may be used individually or grouped together.

Three pin and USB power sockets may be integrated into all units, and wireless charging may additionally be specified for meeting booths, Working Pods and Carrels.

The design and construction of ScreenD lends itself to two, three and even four-tone fabric combinations, and the radiused ply legs may be faced in a wide choice of veneers, lacquers and laminates. Together these options create an unrivalled palette of colours and textures.

ScreenD chair, sofa and meeting booth, with Ligni coffee table. HiBox room dividers to left
